

NEWEVOICE

Building management faces challenges such as increasing cost pressures, digitalization, and environmental regulations. The MobiCall application provides a comprehensive solution that enables seamless connectivity between machinery, devices, sensors, and personnel.

MobiCall streamlines efficient building management by seamlessly integrating various subsystems like process control technology, building automation, and IT components. The platform enables real-time monitoring and administration for top-tier operational control.

The continually evolving demands in building management, especially in sectors like healthcare, industry, and commerce, call for flexible solutions. MobiCall addresses these needs through an adaptable solution that caters to the changing requirements.

Optimize your building management with MobiCall for top-tier performance across various industries!

MOBICALL FEATURES

Flexibility through interfaces

- MobiCall adapts to various environments through flexible interfaces
- Adaptability enables effective utilization across different industries
- Open interfaces facilitate integration with existing systems (e.g. existing GTL or intrusion detection systems)

Emergency Management

- MobiCall displays critical alarms including positioningShortcuts enable rapid response and
 - notification of first responders

Smart Maintenance

- The networking of MobiCall enables predictive maintenance
- Cost reduction through PBX monitoring
- Efficient planning of maintenance activities
- Task management through intelligent photo analysis

Technical components

- MobiCall monitors interface subsystems in real-time
- Automatic transmission of detailed alarm information
 - Customization of the dashboard

Control center and hazard management

- Central monitoring of video and data sources
- Convening crisis teams, live monitoring of alarms, and geo-redundant design
- Integration of digital radio and smartphone clients

Smart Data Integration

- Rapid evaluation through key performance indicators in tables and diagrams
 - Automatic escalation upon exceeding predefined response times
 - Individually customizable interfaces in the management tool

"

Elevate your facility management services to the next level with MobiCall!

Workplace Safety: Thanks to MobiCall!

The safety of lone workers

- Solution supports various alarm types such as alarm management, loss of verticality, immobility
- Continuous monitoring of personal emergency devices
- Positioning via DECT, Wifi, Bluetooth Beacons, GPS
- Visualization of building and site plans

Mobile working with personal protection

- Integrated personal protection module compliant with DGUV 112-139
- MobiCall.App enables transmission and management of tasks on smartphones
- Assisted security patrol using NFC

New Voice International AG newvoice.global

Crisis Management

Integration of intrusion alarm systems with time-controlled arming. Support for building evacuation measures. In case of emergency: Outsourcing of alarm processes to the Mobicloud.

Energy Management

Accomplished through the integration of suitable interfaces to capture information and trigger notifications

Task Management via IoT

Facilitates the immediate creation of a task through the app by capturing a photo and providing a description

PROCESS AND BUILDING AUTOMATION

- Integration of contact controllers (Wago, Honeywell, SAIA...) for recording contact statuses (inputs, outputs, analog values...)
- LPWAN-based protocols for connecting low-energy devices such as battery-operated sensors
- Integrations via, ESPA 4.4.4, Modbus,KNX, BACNet, OPC, XML, ESPA-X, Desigo CC, Siemens S7...

ICT MONITORING

- Integration of management systems
- Direct integration and monitoring of ITK components
 - PBX infrastructures
 - Windows services & processes
 - PING functionalities
 - SNMP Traps V1-V3

SMART FACTORY

- Convergence IT/OT
- Gateway between production and ITK systems
- Controlling workflows such as logistics management
- Visualization of processes and workflows

Ready for the future of facility management with MobiCall!

MobiCall offers a comprehensive solution for integrating subsystems, real-time monitoring, and management across various industries like hospitality, manufacturing, and public facilities. Emphasizing efficient alarm management, cost optimization, and modular applications, it caters to specific requirements of diverse sectors. MobiCall's integrated platform enables flexibility, efficiency, and seamless integration of different systems, elevating your building management services to the next level.

Quick reactions in critical moments are crucial. Learn more on our website!
