MobiCall

Lone Worker Protection with MobiCall and Cares.Watch

NEW VOICE

Protect your Lone Workers with MobiCall and Cares.Watch!

Cares.Watch

Employers are obligated to protect individuals who work alone, whether at remote workplaces or in locations with a higher risk of accidents. Lone work is common across various industries, and MobiCall offers a comprehensive solution.

MobiCall integrates with leading manufacturers of lone worker protection hardware. It enables seamless integration of alarm triggering, management, transmission, and intervention, ensuring that effective help reaches the right place at the right time.

Cares.Watch is an intelligent emergency system integrated into a wristwatch. Alarms can be triggered either manually or automatically, while remaining simple to operate and location-independent.

Automated safety is ensured by handling alarms through the MobiCall Alarm Server. If there is no response, the alarm is automatically forwarded to the next key person. All relevant alarm information is communicated via voice, text messages, and images

Protect your employees with state-of-the-art technology – simple, reliable, and safe!
